“Enrichment, Innovation, Opportunity and Success”

30 January 2014

Dear Parents/Carers,

Semester 1 will see Year 8 Technologies students complete two units dealing with the Key Learning Areas of Food and Mixed Materials.

The Food unit is designed to extend students practical and problem solving skills when dealing with food.

Students will have a major home project where they will be required to research, design, plan, cook and evaluate a two course meal for their family.

Students will continue to cook each week. The recipes chosen for the practical lessons are based upon possible solutions for the students home project. Each week we will be altering and value adding recipes so as to meet family's needs. Students may like to bring additional ingredients from home to customise their food.

The Mixed Materials unit will see students complete a number of projects utilising a wide range of materials.

Students will need to pay \$30 at the front office in Term 1 to cover the cost of food used in these two units.

Please return the slip below to indicate that you have received this information. Thank you for your support with our two new topics.

Yours faithfully

Tracey Jenner
Principal

Jodie Taylor
Technologies Teacher

I have read the above Technologies information note for my child and understand that a subject fee of \$30 is payable to the office in Term 1. Childs name _____ in Year 8.

Signed _____ Parent/Carer Date _____
